## Skills

**Data Analysis**

**Statistical Analysis & Survey Data**

**Data Visualization**

**Data Storytelling**

**Data Cleaning & Validation**

**Data Extraction (PDF & Web)**

**Data Management & Quality**

**Dashboard Development & Reporting**

## Summary

Data analyst and social policy researcher working with quantitative data on welfare, poverty, markets and public services in Iran since 2018. I collect, clean, validate and analyse datasets from surveys, administrative records and national statistics, and turn them into dashboards, reports and data stories for decision-makers. This includes leading a data literacy course for NGOs and organising a project-based workshop on Household Income and Expenditure Survey data. Skilled in R (tidyverse, data.table), Python, SQL and advanced Excel, with dashboards in R or with other tools. I hold an MA in Social Policy from Allameh Tabataba'i University and teach data literacy, data management and applied AI to analysts, journalists and organisational staff. Fluent in Persian and English.

## Experience

**Data Analyst** — Oct 2024
Stats Minute

- Support public-interest data projects on household welfare and poverty using national datasets such as HIES.
- Reproducible cleaning pipelines in R, Python and SQL.
- Run descriptive and inferential statistical analyses and produce estimates using predefined models.
- Apply data quality checks (completeness, consistency, duplicates, outliers) and document data workflows.

**Instructor** — Oct 2024
D-learn School

- Design and deliver project-based courses on Excel, data management, data visualisation and workplace AI for analysts, journalists and administrative staff.
- Develop curricula, exercise banks and teaching guides tailored to organisational needs.
- Lead instructor of "Data Literacy for Non-profit Organisations" with the Moin Charity Institute (Dec 2024): designed and taught the full 12-hour programme on data literacy, data collection and management, Excel analysis and AI for NGO staff.
- Lead organiser and facilitator of a one-day HIES-based data analysis workshop with the Iranian Sociological Association, University of Tehran (Dec 2025).
- Authored the online course "Data Processing with data.table in R" (5 hours).
- Delivered webinars on data extraction from PDFs and websites (Jan 2025) and on moving from social science to data analysis (Jul 2024); guest trainer at the Lifeweb and Tabnak Data Journalism School (2024).

**Editorial** — Oct 2024
d-mag.ir

**Executive Team Member and Secretary** — Oct 2024
d-award.ir

The "D-Award" is the first award in Iran dedicated to data analysis and storytelling within the public sphere for Persian-language works. Established to encourage data analysts, researchers, and journalists, the prize aims to enhance the quality of analytical content in the public sphere by promoting compelling and methodical analyses.

**R (tidyverse, data.table)**

**SQL**

**Python (pandas)**

**Microsoft Excel (Power Query, PivotTables)**

**Power BI**

**Questionnaire Design**
